DigiPlex announces AWS Direct Connect Cloud deployment in Norway in collaboration with Amazon Web Services

DigiPlex, is pleased to announce that its Ulven data centre will host the first Norwegian deployment of Amazon Web Services (AWS) Direct Connect, an offering that makes it easy to establish a dedicated networking connection to AWS. The arrival of the solution represents a significant upgrade to the service available to users in Norway, and bolsters DigiPlex's position as the region's most connected data centre operator.

AWS Direct Connect grants customers a private connection to AWS, reducing network costs, increasing bandwidth and providing a more secure and consistent experience than internet-based connections. With AWS Direct Connect capability, DigiPlex's Ulven data centre will be the primary hub for connectivity to all AWS services in the Norwegian Market.

"We are very pleased to offer AWS Direct Connect for the Norwegian market. This expansion of our existing relationship with AWS allows us to provide our customers and our customers' customers with easy, direct access to the cloud through AWS Direct Connect," says CEO of DigiPlex, Gisle M. Eckhoff.

The announcement follows the news that AWS would be establishing three major data centres in Sweden, greatly expanding its presence in the Nordic region.

"In today's digital world, the data centre is becoming an interconnected business ecosystem for critical digital operations. With AWS Direct Connect available inside our award-winning data centre, DigiPlex is strengthening its position as the data centre operator of choice for local, Nordic and international firms," concludes Eckhoff.

DigiPlex aims to set the standard for best practices within the data centre industry and represents the new generation of data centre suppliers. DigiPlex helps companies maximize savings through innovation while reducing their carbon

footprint and environmental impact. DigiPlex's data centres are powered exclusively by sustainable sources of electricity and their new sites are some of the greenest and most energy efficient data centres in the world.

DigiPlex has been the recipient of many of the industry's top accolades. Most recently, it was awarded "Best Data Centre Energy Solution" and "Marketer of the Year" at DataCloud Europe 2018. DigiPlex won the "Data Center Operations Team of the Year - Colo + Cloud" at the 2017 DCD Awards in December, which capped off a year of significant wins. Its position as a Nordic leader in its field was reinforced by winning "Data Centre Above and Beyond Award" at the DataCloud Awards in June. In May, DigiPlex won the "Outstanding Big Data Management Solution Award" at the annual Big Data and IoT Excellence Awards in London. In 2016 DigiPlex won the "Critical Environment Future Thinking Award" at the EMEA DCD Awards and "Most Innovative Energy Solution Award" at the DataCloud Awards.
