

## DigiPlex Ranked as one of the World's Most Innovative Data Centre Providers

California-based publication CIOReview cites innovation, cost advantage and significant environmental benefits as reasons for DigiPlex' inclusion in its "Most Promising Data Centre Solution Providers 2017" list.

DigiPlex, the leading Nordic-based Data Centre Solution provider, has been recognised by an international panel of industry experts as one of the world's most innovative data centre solution providers to watch.

DigiPlex will be included among the "20 Most Promising Data Centre Solution Providers 2017", a list compiled by the leading Silicon Valley-based publication, CIOReview. Entries to this list are determined by a distinguished international panel of CEOs, CIOs, IT-VPs and the CIOReview editorial board, and showcase providers who exemplify the emerging future of best-in-class data centre solutions.

To be included in the list, DigiPlex was evaluated across over a dozen quantitative and qualitative metrics. The panel considered the breadth of DigiPlex's services, including its market leading cooling technology, clean energy sourcing, and ability to provide both colocation and build data centres to customer specifications. Additionally, the company's track-record, industry recognition, technical certifications, market presence and client feedback were taken into consideration.

Inclusion in this global list is a milestone for the Nordic-based DigiPlex, which has seen a significant increase in international demand for its award winning, ISO certified and environmentally sustainable data centres.

Confirmation of DigiPlex's standing against the world's most notable data centre providers arrives on the heels of a series of significant European award wins for DigiPlex. In December, DigiPlex was awarded the "Critical Environment Future Thinking Award" at the annual EMEA DCD (Datacenter Dynamics) awards, which celebrated DigiPlex's efforts to apply industry-leading power usage effectiveness (PUE) to the substantial climate advantages of the region. Earlier that year it was awarded the coveted "Most Innovative Energy Solution Award" at the Data Cloud Europe convention in recognition of its breakthrough work in developing and implementing energy-efficient solutions, particularly in the field of cooling technology.

**Jeevan George, Managing Editor of CIOReview**, said,

- *"DigiPlex has been on our radar for some time as one of the most innovative and forward-thinking players in the data centre space. DigiPlex's solutions continued to break new ground in the past year, introducing award winning innovations and capabilities that we see as providing significant benefits to customers around the world. We are happy to have the chance to showcase DigiPlex's achievements, and to introduce it to an ever-widening global audience."*

**Gisle M. Eckhoff, CEO of DigiPlex** said,

- *“DigiPlex is working to revolutionise the data centre market, which is rapidly becoming one of the most critical elements of the international and increasingly digitally connected business ecosystem. We are delighted to have our efforts recognised by CIOReview and to be included among the very best players in our field.*
- *“As the world’s data requirements continue to grow, considerations about the cost, capabilities and environmental impact of data centres will only become more important. DigiPlex culture of constant innovation combined with the incredible geographic, and cost advantages of the Nordic region allow us to meet the current and future demands of customers around the world.”*
